Main operations' outlook

GEK S.A

Apart from consolidating the Construction and Renewable Energy activities of TERNA and TERNA ENERGY, GEK's activities include:

Real estate:

In **real estate**, EBIT reached € 21.4 mio compared to € 21.5 mio in 9M 2007. For the coming periods, visibility in Real estate profitability is low: economic crisis does not allow estimations about future profitability. Expansion in Russia and Ukraine is “frozen” and exposure in these countries remains zero.

Concessions:

Ionian road contributes already

Also, numerous PPPs will be tendered in the coming periods, in which the group has already targeted a significant share.

Thermal Energy:

The existing gas-fired plant (147 MW) generated sales of c43.8 mio, c7.2 mio EBITDA and EBIT of c4 mio, lower compared to 9M 07, mainly due to the lack of trading profits. The construction of the second project (435 CCGT) proceeds according to plan and it is expected to be operational within 2009.

Moreover, the Group proceeds with the preparation of a third plant (CCGT-435 MW), targeting to more than 1000 MW (thermal capacity) in operation within the coming years.

TERNA S.A

Construction:

Backlog reaches c2.1 bio euros, and its execution starts accelerating: construction sales stood at € 418 mio compared to 229.8 mio in 9M 07 and EBIT at 21.7 mio compared to 7.6 mio in 9M 07. EBIT margins stood at 5.2%. Ionian Road and Central Greece motorway started execution, expected to contribute in construction turnover for the coming 5-6 years.

Renewable Energy:

In Renewables, TERNA ENERGY proceeds with its investment plans: 177 MW of wind and small hydro are either operational or at the latest stages of construction. The Land Planning for Renewables is getting in force and will greatly facilitate new installations, in the mid term. Also, TERNA ENERGY is expected to secure licenses and start construction in key markets outside Greece in the coming periods.
