New Application Cycle for the Postgraduate Program in “Infrastructure and Construction Project Management” of the National Technical University of Athens

Strategic Partnership between GEK TERNA Group and the National Technical University of Athens

The application period has begun for the Professional Interdepartmental Postgraduate Program (PIPP) of the National Technical University of Athens, titled “*Infrastructure and Construction Project Management*”, for the academic year 2026–2027. The program is implemented with the exclusive support and funding of the GEK TERNA Group, within the framework of a five-year strategic partnership.

For the upcoming academic year, a total of 30 positions are available, three of which are reserved for candidates meeting specific social and financial criteria. The program is organized by the School of Civil Engineering of NTUA, in collaboration with the Schools of Mechanical Engineering and Electrical and Computer Engineering. It has a minimum duration of three semesters and leads to the award of a Postgraduate Diploma (MSc). Courses are delivered in both Greek and English.

Three years ago, when the National Technical University of Athens and the GEK TERNA Group joined forces, their objective was to support young engineers, enabling them to effectively respond to current challenges and the ever-evolving demands of the sector.

Today, the program has already yielded its first graduates, confirming in practice the Group’s commitment to investing in the new generation. This initiative contributes to shaping a highly skilled workforce equipped with the necessary capabilities to excel in the infrastructure and construction sector, both nationally and internationally.

Interested candidates wishing to apply for the academic year 2026–2027 are invited to submit their applications by May 31, 2026, electronically through the program’s Secretariat via the website: <http://www.deyk.ntua.gr/>.

For further information, applicants may contact the PIPP Secretariat via email at: mscdeyk@mail.ntua.gr.
